

# DRASA VETERINARY MANUAL

## DRASA CODE OF CONDUCT FOR THE WELFARE OF THE HORSE

DRASA requires all those involved in long distance horse riding to adhere to the DRASA Code of Conduct. At all times the welfare of the horse must be paramount. Welfare of the horse must never be subordinated to competitive or commercial influences.

This manual is just to give an idea of the process by vets when vetting horses at DRASA events. It is not the DRASA vet rules but should be read in conjunction with the **Veterinary Rules** and the Veterinary part of the scorecard.

### **Pre Ride Vetting**

The Pre Ride vetting is scored in total out of 10 points:

**Pulse:** Maximum 5 points for the initial pulse – please measure the pulse and cross/tick the block under the relevant bpm – this will allocate a score to the criteria. All horses have to present with a pulse of 60bpm and below. Anything above is a Disqualification and the horse/rider combination may not start

**Body Condition:** maximum 5 points – based on the body condition scoring table provided in the Veterinary Rules. Please tick/cross under the appropriate block allocating a score to the criteria. Any horse in a poor condition is Disqualified and may not start the event. Please score according to the table- we get a variety of horse breeds and it is important not to discriminate against the big boned breeds as fat when they it is rather a moderately fleshed draft type breed.

**Non Scored Criteria:** these are the normal criteria used to ensure that the horse is fit to start the event but are not scored.

Capillary Refill- write in the seconds

Hydration – write in the letters as indicated

Gut Sounds - write in the letters as indicated

Lesions - write in the letters as indicated

Motion- all horses with a lameness may not start and are DQ with a reason noted

Habitus - write in the letters as indicated

### **First Leg/Second Leg**

If the rider/horse combination are doing 2 legs in the event please use First Leg and Final Vetting. If they are doing three legs us First Leg, Second Leg and Final Vetting.

Each leg is scored out of a total 10 points:

**Pulse:** maximum 5 points- this is the initial pulse of the CRI and must be written down under the relevant block thereby scoring the pulse criteria. Now the CRI can be done and then this first pulse will be written down over the second pulse in the relevant CRI clock

**CRI:** maximum 5 points Take the first pulse, trot the horse out while checking for Motion and then within 60 seconds write the second pulse down. This will be written in the relevant block on the Vet Card thereby allocating a score to this criteria.

**Non Scored Criteria:** these are the normal criteria used to ensure that the horse is fit to continue in the event when taken in conjunction with the CRI and Pulse , but are not scored.

Capillary Refill- write in the seconds

Hydration – write in the letters as indicated

Gut Sounds - write in the letters as indicated

Lesions - write in the letters as indicated

Motion- all horses with a lameness may not start and are DQ with a reason noted

Habitus - write in the letters as indicated

### **Final Vetting**

This is the Final vetting of the horse after the final leg is completed

The same Criteria and Scores apply as per the previous legs

### **The Final Fit to Travel Home Examination**

If the veterinarian is of the opinion that the horse is fit to travel he shall complete a release card and hand this to the person responsible.

### **Example of Completed Vet Card**
